Education

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Artificial Intelligence CGPA: 8.78

September 2022-June 2026

Bhopal, India

Technical Skills

Languages: Python, C++, HTML, CSS, JavaScript

Libraries: Matplotlib, Pandas, Seaborn, NLTK

Databases: MySQL, MongoDB

Visualization Tools: Power BI

Projects

CHAT APP (*HTML, CSS, JavaScript, MongoDB*) [\[Link\]](#)

- Developed a web-based chat interface using HTML, CSS, and JavaScript, ensuring a responsive and user-friendly experience.
- Designed and managed the database layer using MongoDB with Mongoose, implementing efficient data models for users and chat messages.
- Utilized JavaScript to handle client-side logic and real-time data interactions, enabling smooth message handling and dynamic UI updates.

RECOMMENDATION SYSTEM (*Pandas, Matplotlib, NLTK*)

- Cleaned and preprocessed raw datasets using Pandas, handling missing values, duplicates, and data inconsistencies.
- Performed text preprocessing and feature preparation using NLTK Porter Stemmer to enhance content-based recommendation accuracy.
- Conducted exploratory data analysis and visualization using Matplotlib to analyze user preferences and recommendation patterns.

Sales Performance Dashboard (*Power BI, DAX, Power Query*) [\[Link\]](#)

- Designed an interactive Power BI dashboard to analyze sales performance, revenue trends, and regional insights.
- Cleaned, transformed, and modeled raw data using Power Query to ensure accuracy and consistency across reports.
- Created calculated measures and KPIs using DAX to track sales growth, profit margins, and top-performing products.
- Implemented slicers, filters, and drill-down features to enable dynamic analysis and data-driven decision making.

Achievements & Activities

- Regularly practiced coding fundamentals and problem-solving techniques, strengthening logical thinking and core programming skills. Completed 100 Days Coding challenge in LinkedIn.
- Authored a research paper on **Artificial Intelligence in Agriculture**, exploring AI-driven solutions to improve crop yield and resource efficiency.
- Active member of the **E-Green Club** and **Anime Club**, contributing to sustainability initiatives and collaborative cultural activities.

Certifications

Privacy and Security in Social Media (NPTEL)
Full Stack Web Development (SmartInternz)

Machine Learning with Python (Coursera)
