SUMMARY

Engineering student with hands-on experience in building and handling projects related to data analysis, automation, and web development. Have worked on end-to-end projects where I planned tasks, tracked progress, and improved workflows. Comfortable using tools like Excel, Power BI, and python and interested in roles involving project coordination and execution.

EDUCATION

Vellore Institute of Technology

July 2022 – May 2026

B. Tech in Computer Science in Artificial Intelligence and Machine Learning

C.G.P.A: 8.79

SKILLS

Frameworks: React, Django

Tools: Microsoft Excel, Power BI, Git, GitHub

Technologies: React.js, Node.js, Express.js

Languages: Python, SQL, C++

PROJECTS

CHATAPP | HTML, CSS, JavaScript, MongoDB

2025

- Developed a web-based chat interface using HTML, CSS, and JavaScript, ensuring a responsive and user-friendly experience
- Designed and managed the database layer using MongoDB with Mongoose, implementing efficient data models for users and chat messages.
- Utilized JavaScript to handle client-side logic and real-time data interactions, enabling smooth message handling and dynamic UI updates

Sales-Performance-Dashboard | SQL, Power BI

2025

- Cleaned and preprocessed raw datasets using Pandas, handling missing values, duplicates, and data inconsistencies.
- Performed text preprocessing and feature preparation using NLTK Porter Stemmer to enhance content-based recommendation accuracy.
- Conducted exploratory data analysis and visualization using Matplotlib to analyze user preferences and recommendation patterns.

SOCIAL MEDIA APP | React, Express.js, MongoDB

2026

- Built a full-stack social media platform enabling users to create profiles, post content, like, comment, and follow/unfollow other users
- Developed responsive frontend using React.js with dynamic UI components and state management
- Integrated MongoDB for efficient storage and retrieval of user data, posts, and relationships

CERTIFICATIONS

IBM Data Analysis with Python (**IBM**)

Salesforce (**Ethunus**)

Full Stack Web Development (**SmartInternz**)

Privacy and Security in Social Media (**NPTEL**)

EXTRACURRICULAR

- Regularly practiced coding fundamentals and problem-solving techniques, strengthening logical thinking and core programming skills. Completed 100 Days Coding challenge in LinkedIn.
- Authored a research paper on Artificial Intelligence in Agriculture, exploring AI-driven solutions to improve crop yield and resource efficiency.
- Active member of the E-Green Club and Anime Club, contributing to sustainability initiatives and collaborative cultural activities
